

Invitation

CII Seminar Series

Maternal hair metabolome
and exposome associated
with healthy and complicated
pregnancies

Wednesday
3th of October 2018
2:00 p.m.

CII Building
1st Floor
Irinis 95, 3041 Limassol

Cyprus
University of
Technology

Dr. Thibaut Didier J. Delplancke

Dr. Thibaut Didier J. Delplancke is from Kortrijk, Belgium and holds a PhD in pharmacology from Chongqing Medical University, including a visiting PhD studentship at Liggins Institute of early life research within the University of Auckland, New Zealand.

Dr. Delplancke also holds a MSc in Analytical Chemistry from Uppsala University, and a BSc in Chemistry from the Catholique University college Sint-Lievens, Ghent.

His PhD research focused on the application of metabolomics tools to study the exposome associated with pregnancy complications in a Chinese cohort. His research interests lie in the field of human exposomics and its potential to improve our understanding about the effects of environmental stressors on disease development.
