Dr. Khosrow Kashfi is an Associate Medical Professor at the Sophie Davis School of Biomedical Education, City College of New York, USA. He holds a BSc degree in Chemistry from Kingston Polytechnic, UK, an MSc in Polymer Physics and Engineering from Cranfield Institute of Technology, UK, as well as a PhD in Pharmacology from the University of Tennessee, USA. Dr. Kashfi went on to carry out post-doctoral research in Cornell University Medical College and Rockefeller University before joining CCNY as Faculty. He currently serves as Medical and Physician Assistant Pharmacology Course Director. His research interests include the biology of colon and pancreatic cancers and their chemo prevention, the regulation of lipid metabolism including eicosanoids, while he currently has an ongoing collaboration with the Cyprus University of Technology on the employment of hybrid priming agents in plants against abiotic stress factors. He has supervised a number of undergraduate, postgraduate and doctoral students, while his research has led to the publication of 64 research articles (h-index: 24) and 3 book chapters. Dr. Kashfi is also a member of the editorial board of the Journal of Biochemical Pharmacology.
