## Tepak joins €2.8 million maritime research project

By Kyriacos Nicolaou

THE Cyprus University of Technology (Tepak) has announced its participation in the Maritime Digital Transformation Research Infrastructure (MDigi-I) project, which has now received funding. According to a Tepak statement, the project, which was recently financed

by the Cyprus Research and Innovation Foundation (RIF) with €2.8 million, as part of the Strategic Research Infrastructures call, aims to create national research infrastructure for Cyprus and advance research and innovation for the digitalisation of the maritime sector. Commencing in January 2024, MDigi-I is a three-year project focused on

establishing a strategic research infrastructure to promote collaborations and facilitate the development and adoption of digitalisation technologies in shipping. The project consortium, led by Ioannis Kyriakidis, Director of Research for Maritime Technology at the Cyprus Marine and Maritime Institute (CMMI), comprises 11 partners.
