

Doctoral Vacancy Announcement form

Research Topic Title: Educational Technology & Learning Experience Design (LXD)

No. of Openings: 1

Description: Educational Technology, Learning Experience Design, Technology-Enhanced Learning

The successful PhD candidate will conduct research in the broader field of Educational Technology and Learning Experience Design (LXD), with emphasis on the design, implementation, and evaluation of innovative learning experiences supported by emerging technologies.

The research may focus on one or more of the following indicative thematic areas:

- Learning Experience Design grounded in the learning sciences
- Design-Based Research (DBR) in formal and non-formal educational settings
- AI-supported learning environments and the responsible use of Artificial Intelligence in education
- STEAM, integrated STEAM, and STEM+ learning environments

Required Qualifications:

- A Master's degree from a recognized university in a relevant field (e.g., Educational Technology, Education, Design, Digital Media, Human-Centered Design, Informatics in Education, or a related discipline).
- Strong interest in the design and research of learning experiences.
- Very good command of the English language.
- Ability to work independently and demonstrate strong academic writing skills.

Additional Qualifications (considered an advantage)

- Good knowledge of research methodology (qualitative, quantitative, and/or mixed methods).

Funding:

This position is not funded.
